The HIV Epidemic: Improving outcomes for adolescent youths

Summarize and reflect on the talk given by Dr. Agwu (less than 1 page)

- Your attendance is required for the entire duration of the session. Taking a few notes during the talk will help you recall specific content/questions/thoughts when writing your reflection afterward
- Your summary should include the speaker's name and title and a sentence or two on the background and/or main motivation for the research. Some questions you might wish to answer: What is state of the field? How does the research build on past knowledge? What is novel about the work?
- Include at least 3 specific pieces of evidence that the speaker provided related to their research topic. If you mention an experiment, it will be helpful to briefly summarize the method, result, and conclusion.
- Conclude your summary with the significance of the research. How does it progress knowledge or human health?
- Reflect on an element of the research that was of interest to you, and why it was of interest. Did you learn something surprising or counterintuitive?
- Propose future experiments that you'd like to see.
- Please write at least one follow-up question for the speaker
