

Bacteria in our homes

New Yorker article:

1. Read the following article by Nicola Twilley: <http://www.newyorker.com/tech/elements/whats-lurking-in-your-showerhead> (pdf can be found on moodle)
2. Follow the link to the showerhead project and sign up: <http://robdunnlab.com/projects/showerheads/> (optional but recommended)
3. Follow the link to the “Wild Life of Our Homes” from the same laboratory (Rob Dunn): <http://robdunnlab.com/projects/wild-life-of-our-homes/> and read the project description
4. Pick one of the 4 hypothesis presented for this project
 - 4.1. What is the null hypothesis?
 - 4.2. What data would support the hypothesis?
 - 4.3. Design an experiment that would be able to test this hypothesis and explain how your experiment directly tests the hypothesis.
 - 4.4. Write a step-by-step protocol for your experiment,
