

Microbes: a natural product pipeline

Reflect on the talk given by Dr. Turner (less than 1 page), and try to write a press release:

- Your attendance is required for the entire duration of the session. Taking a few notes during the talk will help you recall specific content/questions/thoughts when writing your reflection afterward
- Follow the general instructions given by : <https://www.asbmb.org/Outreach/Resources/HowTo/PressRelease/> with a few modifications:
 - Make sure to include the significance/relevance of the research. How does it progress knowledge or human health?
 - Include an element of the research that was of interest to you, and why it was of interest. Did you learn something surprising or counterintuitive?
 - Propose future experiments that you'd like to see.
- Please write at least one follow-up question for the speaker
